

## ELEVATOR TEST CART - 500 LBS

A rigidly designed Box Section Unit consisting of 1/4" steel plate and 1 1/4" schedule 40 pipe engineered specifically for the elevator industry.

Manufactured with safety, serviceability and durability in mind.

- The wheels on this unit are solid 8" rubber tires with a steel core and have roller bearings and grease fittings.
- The unit is painted primer grey. We can provide custom logo or paint applications.
- Each unit weighs 500lbs. loaded with eight weights of 50 lbs. each and is balanced for easy handling.

Dimensions:  
8" Wide - 26" Long - 42" High

Equipped with a 3/4" steel rod that serves as a locking bar at the top of the box.

This bar has been designed with a padlock to prevent theft of the unit's contents.

(Lock and keys supplied with each unit.)
